

## Demonstration of Interest to Ladies

A. G. Studer is sponsoring something new for a town of this size which is of great interest to the ladies, in bringing here Miss Florence Sparling, stylist for the Wabasso Cotton Company who has given demonstrations the length and breadth of Canada.

Miss Sparling will demonstrate the new season's goods of the Wabasso Co. at the Petersen Block this Thursday and Friday at 3 p.m. each day. She will exhibit by living models some of the alluring garments which can be fashioned from these new fabrics in the smart lines of the new styles. Local girls will act as mannequins for the occasion.

Not garments alone will be exhibited, but dainty things in household decorations, curtains, draperies and bedspreads, etc., which are so easily contrived from cotton materials.

Whether you are interested in the decoration of your person or your home, you will find much of interest at this demonstration, as Miss Sparling will answer any question pertaining both to home furnishings and garments, as applied to Wabasso products—which are All-Canadian, manufactured at Three Rivers, Que. Those who attend for the hour on either day are entitled to a free chance to win one of the three Wabasso bed sets given away each day.

## Rain Over Weekend Brings Added Moisture

The rain and snow last weekend added moisture to the fields here and has put the ground in excellent shape to start the crop.

Most of the wheat is now in the ground and the sowing of coarse grain is well advanced.

The wet weather was general throughout Alberta and the seeding has been delayed in the north on account of the soggy condition of the field. It is reported to be the latest seeding in twenty years in those districts.

## Jubilee Fund To Approach Half Million

The Countess of Bessborough will formally hand over to the seven Canadian trustees of the King George V. Silver Jubilee Cancer Fund for Canada a total of about \$500,000 on June 3, the date of His Majesty's birthday, it was announced.

## Dominion Issue Of New Bonds

Public offering of a new issue of \$60,000,000 Dominion of Canada bonds was made Wednesday.

The issue, proceeds of which will be used for general purposes, will be in two series, 8 and 20 years, and will bear coupons at the rate of 2½ and 3 per cent respectively.

The 8-year bonds will mature June 1, 1943, and will sell at 99.50 giving a yield of 2.57 per cent; the 20-year series will mature June 1, 1955, and will sell at 98.50 yielding 3.10 per cent.

The shorter term issue will be non-callable but the 20-year maturities will be callable at par on June 1, 1950, or on any interest date thereafter. The 20-year bonds will be in denominations of \$500 and \$1,000, and the 8-year issue in denomination of \$1,000 only.

Public subscriptions may be made through any branch in Canada of any chartered bank or through recognized bond dealers. The distribution of the bonds will be made through the Bank of Canada acting as fiscal agents of the Dominion. Payment will be made in full against delivery of interim certificates on or about June 1.

## Christian Science.

At all Christian Science Churches next Sunday the subject of the lesson-sermon will be, "Mortals and Immortals." The following is one of the scriptural quotations contained in the lesson-sermon: "Now after John was put in prison, Jesus came into Galilee, preaching the gospel of the kingdom of God. And saying, the time is fulfilled, and the kingdom of God is at hand: repent ye, and believe the gospel."—Mark 1:14,15. One of the correlative passages from "Science and Health, with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 495): "Let Christian Science instead of corporeal sense, support your understanding of being, and this understanding will supplant error with Truth, replace mortality with immortality, and silence discord with harmony."

## Fishing Opens Today.

The fishing season opens this morning and the local nimrods have been busy looking over their tackle and there is likely to be an exodus of fishermen to the west country this weekend.

## Christian Commonwealth of Youth Movement

A meeting was held at the United Church Monday evening under the auspices of the Christian Commonwealth of Youth Movement.

Mr. Colley of Calgary spoke to an interested group of young people and outlined the aims and objects of the movement.

## Oh for Bob Edwards!

What fun there'd be in Alberta today were Bob Edwards alive to give his unbridled opinions on provincial affairs. His humor would enliven the day most decidedly. He would be a contrast to the grim seriousness of some of the radio talk which almost dominates Alberta's political problems, with Brother Aberhart's booming bass voice and his stage foil, (Ernest Manning with his sepulchral monotone) talking of "creeping things" and "speckled horses." It needs a little humor to save our flesh from creeping. —COLEMAN JOURNAL.

## NOTICE

Motorists are requested not to drive on the race-track at the Butte during wet weather. Local horsemen are trying to keep the track in shape for working out their horses and it is discouraging to find the track cut up by cars after a wet spell. Driving once around the track with a car when wet may mean hours of work to put the track back into shape.

## Evangelical Church Notes

At the morning service on Sunday the sermon will be entitled "Stewardship." In the evening the subject of the message will be, "The Simplicity of Christ."

## WEEKLY JOKE

Employer: "What can you do, boy?"  
Boy: "Anything, sir."  
Employer: "Can you wheel a barrow full of smoke?"  
Boy: "Sure—if you'll fill it!"

## Empire Day May 24th.

The local stores will be open on Wednesday of next week and will be closed on Friday, May 24th.

## Major Douglas at Edmonton

Major C. H. Douglas, originator and chief proponent of the "Douglas Social Credit System," who has been engaged by the Provincial government to investigate the feasibility of applying his theories to this province arrived at Edmonton early Sunday morning. He was accompanied by Mrs. Douglas and his secretary, Miss Willis, of London.

## Churches Exchange Music.

The choir of Knox United Church went to Innisfail on Sunday evening and rendered the cantata, "Resurrection Light" at the United Church.

In exchange a male quartette from the Innisfail choir came to Didsbury United Church, and Rev. T. J. Stainton took the service.

After the service at Innisfail the Didsbury choir were entertained at the home of Mr. and Mrs. J. R. Miller.

## Stresses Danger Of Riding on Sidewalk

"We are trying to stop this riding on sidewalks and carrying passengers. There is absolutely no regard for the rules of the road, and some day someone will be killed. Next time the fine will be higher," Magistrate Scott warned Joseph Ross in city police court recently, when he fined him \$3 for riding a bicycle on the sidewalk.

Joseph Derry left his bicycle in the care of city police for two weeks for carrying a passenger. —Calgary Herald.

## Blooded Alberta Stock for U.S.A. Gets Big Prices

An \$8,000 consignment of high-grade Alberta cattle has been shipped to Washington and Oregon to create new blood in cattle in the United States drought areas where many of the better class animals have been killed off. The shipment contained many prize-winning animals and a top price of \$185.00 was received, it was reported.

Organize on Friday.  
Start on Saturday.  
Fish on Sunday.  
"Never Again" on Monday.  
Still tired on Tuesday.  
All set for more again Wednesday.

## Two Stores Broken Into

During the last few days two Didsbury stores have been broken into and a quantity of goods stolen from each.

On Thursday night Constable Kercher discovered that one of the basement windows at the rear of Hawke's Store had been removed and on making investigations it was found that the store had been entered, and a 22 rifle, a quantity of shells and a number of other articles had been stolen.

The matter was reported to Constable Dyck of the R.C.M.P., who next day recovered the stolen goods and arrested two local youths. They were brought before Magistrate Pentt of Olds and remanded until Saturday morning.

Monday night Studer's Store was entered and a variety of goods stolen.

The thieves entered the store by way of the coal chute and apparently took their time in selecting the goods carried away. There was evidence of them having tried on a number of pairs of shoes, and a selection was made of house dresses, shirts, shoes and other goods. A quantity of cigarettes and tobacco was also missing from the Halliday stock.

The Mounted Police and Constable Kercher are investigating.

## Advertising Pays.

At the end of April Mr. Ray Lantz received a letter from Mr. "Mac" Watson of Dallas, Texas regarding a radio.

He told Ray that he was receiving the Pioneer regularly from his father Mr. George Watson, and reading Ray's ad. and interesting himself in a radio for his parents here in Didsbury asked for circulars and prices of the different radios Mr. Lantz was selling.

Mr. Lantz replied by return mail, giving him the prices, etc., and in a week's time received a draft from Dallas and instructions to install a Philco Radio in the home of Mr. and Mrs. George Watson.

The climax of the deal is that the radio was installed as a complete and pleasant surprise to "Mac's" father and mother. It also goes to prove that advertising pays.

## Bounty for Crows and Magpie Eggs

Both the municipalities of Mountain View and Westerdale are offering bounties for crow and magpie eggs and mature heads of either bird.

Up to June 1st 1¢ each will be paid for eggs and 2¢ each for mature heads.

The eggs and heads will be received at the Adshend garage or by any of the councillors.

## You And Your Country

Throughout the length and breadth of this Dominion, at public gatherings of every description, banquets, Canadian Club, Service clubs, Board of Trade meetings, political gatherings, school assemblies, etc., men and women lustily sing "O Canada, we stand on guard for thee," while to the south across the line of the 49th parallel our neighbors sing "My country 'tis of thee." In Canada, on July 1st we proudly celebrate the uniting of the several Provinces into one confederation thus creating this young nation, while on July 4th our American cousins rejoice in commemorating the obtaining of their independence.

Both countries to-day, in common with the rest of the world, are facing grave difficulties,—difficulties of an economic character resulting from the Great War and the insane wave of narrow economic nationalism which has since swept over the nations, leading them to think of "my country" only and utterly regardless of the fact,—which should never have been lost sight of,—that in this modern world no country can think only of and live unto itself alone.

Now, because these policies of national self-sufficiency, of economic isolation, have failed to work,—on the contrary, have resulted in a stagnation of world trade and loss to all nations and peoples,—and unemployment on a gigantic scale with all its attendant losses and sufferings for millions of people prevail, men and women everywhere are no longer thinking in terms of their country, but are thinking solely of themselves.

As the direct outcome of their personal difficulties, and this thinking of themselves instead of their fellowmen, their community and their country,—in a word, narrow nationalism developed to its ultimate and inevitable end,—men and women are now demanding that, instead of standing on guard for their country, the country should do everything for them as individuals. Wrong thinking has brought many people to entertain the idea that, instead of them owing any duty or obligations to their country, the country owes everything to them, and if the country will not or cannot supply all their needs and desires, then they are prepared to destroy their country.

All governments the world over are now being asked to do the impossible, because people have forgotten that governments are, after all, but the people themselves acting in a corporate capacity. So it is that, as individuals, people are demanding that their governments shall do for them, and assume burdens and responsibilities on their behalf, which are too great and heavy for the people as a whole to assume and carry, because whatever a government does the people must pay for.

There is a crying need for a reconstruction in our thinking in these trying times; it is absolutely necessary that as a people we give much more thought to fundamentals and less to the incidentals of life.

One of these fundamentals is that no person should expect or ask a government to do anything for him that he can possibly do for himself. We create governments, not to do things for us that we can and ought to do ourselves as individuals, but only to do those things that single-handed we cannot do, but collectively we can do. What we can do ourselves, we ought to do and must do because we can do it better, more economically and more efficiently, and more to our satisfaction, than any government can possibly do.

A second fundamental is that in order that those things we must rely on governments to do for us in our community or national life can be done we, as individuals, must supply with means through taxation to enable the government to act. Therefore, one of the first efforts of all people should be to pay their just taxes and pay them as promptly as possible. Unfortunately, a habit of mind has developed to an alarming extent that the payment of taxes is the last thing about which an individual should concern himself or herself. Many people are prepared to pay any and every other obligation before their obligations to governments; indeed, many go ahead gratifying their desires and wishes with money which actually does not belong to them, but is rightfully the property of the State,—that is, the property of all the people to be used for the benefit not of one individual but of the community and nation. So long as this idea prevails, and is acted upon, governments cannot do what they are created to do, are expected to do, and would do if they had the means where with to do it.

Within recent years thousands of people, lacking employment, have received hundreds, and some families over a period of years, thousands of dollars in relief payments to provide them with the necessities of life which in more normal times they provided for themselves out of wages earned. But if they are asked to do a few days or weeks work now to be credited against the advances made to them during these years, many of these people refuse to make payment through the rendering of the service asked of them. Yet they have already been paid for such work at a rate which actually totals hundreds of dollars a week for any work they might now do.

Are they giving a thought to their country now, or only thinking of themselves? Are they helping their governments to continue to help them, or are they weakening their governments in the efforts being put forth in their behalf.

What is your attitude to your country?

## The Abundant Vitality of Cod Liver Oil PLUS PLEASANT TASTE

For over fifty years doctors have specified "Scott's Emulsion", wherever the bone-building, strengthening qualities of pure cod liver oil were indicated. For Scott's Emulsion is more than just cod liver oil. Scott's Emulsion is pure cod liver oil, emulsified for easier digestion, greater efficiency and pleasant taste.

## Little Journeys In Science

### THE STRUGGLE TO LIVE

(By Gordon H. Guest, M.A.)

Every plant and animal is exposed to unfavorable conditions, and the organism must successfully contend with these conditions in order to remain alive. No two plants or parts of plants are exposed to exactly the same living conditions and a plant meets its particular conditions either by dying, or by adapting itself to them.

The tree withstands the cold by stopping its active growth, hardening its tissues and dropping its leaves. Many herbaceous or soft-stemmed plants meet the cold by dying to the ground and withdrawing all life into the root parts. Some plants combat the cold by dying outright, and providing abundance of seeds to perpetuate the kind next season.

Plants adapt themselves to light by growing towards it; or by hanging their leaves in such a position that they catch the light. In less sunny places they increase their leaf surface, or greatly lengthen their stems so as to overtop their fellows, as do trees and vines.

The struggle for existence and adaptation to conditions are among the most significant facts in nature. The sum of all the conditions in which a plant or an animal is placed is called environment. Environment comprises the conditions of climate, soil, moisture, exposure to light, relation to food supply and contention with other plants or animals. The organism either adapts itself to its environment or else it weakens and dies.

The plants that most perfectly meet the conditions in which they are placed are able to persist, and they perpetuate themselves. Their offspring usually inherit some of the characteristics which enabled them successfully to meet the battle of life, and the fit, that is those best adapted to their conditions, tend to survive.

Adaptation to conditions depends on the fact of variation. If plants were perfectly invariable, that is, all exactly alike, they could not meet new conditions. Conditions are necessarily new for every organism and it is impossible to picture a perfectly inflexible and stable succession of plants or animals.

Man has modified plants and animals for his use. All our common domestic animals are very unlike their original ancestors, and our common and long-cultivated plants have varied from their original forms.

By selecting seeds from a plant that pleases him, the plant breeder may, under given conditions, produce numbers of plants more or less as he desires them. From the best of these, he may again choose; and so on until the race becomes greatly improved. This process of continuously choosing the most suitable plants is known as selection. A somewhat similar process goes on in wild nature, and it is then known as natural selection.

## BEFORE BABY CAME

Mrs. George Schrumm of 128 Stoney Rd., Woodstock, Ont., says: "My strength was almost gone before the birth of my little girl. I couldn't sleep, did not care to eat and headaches upset me terribly. Two bottles of Dr. Pierce's Favorite Prescription strengthened me so that I suffered no more weakness. I continued in the best of health."

All druggists. New size, tablets 50 cts., liquid \$1.00. Large size, tabs. or liquid, \$1.35.

## Session Prorogued

### Manitoba Government Authorizes Large Sum For Hydro Extension

The third session of the 19th Manitoba legislature has prorogued, Lieutenant-Governor W. J. Tupper giving royal assent to 56 bills passed during the last few days of the session.

Among bills given royal assent were money measures providing for total expenditures of \$14,083,000 during the next fiscal year, and authorization for a capital outlay for Manitoba hydro extensions over a large area.

Enabling legislation making Manitoba the first province in the Dominion to take steps to provide pensions for blind persons also was approved.

More than 32,000 people in Canada speak Gaelic as their mother tongue, and of this number over 24,000 are in Nova Scotia, the Dominion bureau of statistics reported.

Taking pictures of heat to read temperatures that thermometers cannot reach was recently described. For practical purposes it reads the insulating power of wood.

China is to have an exchange transactions tax. 2094

## Chinese Pirates

### Vessels Along Coast Of China To Be Armed To Repel Attacks

Investigation following the pirating of the steamer Tungchow, attacked early in the year while she was carrying 75 mission school children, including some Canadians, from Shanghai to Chefoo has convinced the China Navigation Company that if piracy is to be stamped out along the China coasts, passenger ships must be protected by more guards who are "quick on the draw."

It was indicated the heavy pistols used by the Russian guards on the Tungchow were too unwieldy to be drawn quickly. The British-owned company has now announced the guards on its vessels will be increased 50 per cent. and be supplied with weapons which can be brought into action promptly.

## Why Your Head Aches

### Too Much Air In Ventricles According To Science

Does your head ache? Then there's too much air in your ventricles—tiny little spaces within the brain connected to the spinal canal.

Science has ascertained, Dr. Frederick Tilney told the New York Academy of Medicine that headaches are apt to occur when air gets into the third and lateral of these little spaces.

Hyper-sensitive persons may derive a headache from consuming milk or eggs, sugar and other foods, Dr. Alexander Lambert told the symposium. Excessive smoking may bring pain to another. Some persons get a headache from coffee; others may use coffee to cure the same ill.

He: "May I have some stationery?"

Clerk (haughtily): "Are you a guest of the hotel?"

He: "Goodness, no! I'm paying two guineas a day."

## Clever Reporters

The versatility of ship reporters is noted wherever newspapers are published. They swarmed all over a vessel entering New York harbor when they learned a "Barbara Hutton" was aboard. Were they disappointed when they learned she was a Canadian girl and not the five and ten princess? Not a bit. They wrote a story about the "comedy of errors."

## AT 62—IN BED WITH RHEUMATISM

### At 65—Working Again

Why worry about rheumatism? This old fellow had it almost as bad as it could be. But he just found the right remedy, stuck to it, and now he's working again—at 65 years of age.

Let him tell you all about it:—"For two years and a half," he writes, "I have suffered from rheumatism. For eighteen months I could not turn over in bed, nor help myself in any way. My legs and feet were swollen, and I could not sleep or get any rest until I started taking Kruschen Salts. After taking one bottle, I went about on two canes. I kept on taking it, as I found the pains were leaving me. I have taken six bottles, and now I have started work again. I am 65 years of age, and everybody that knows me says I am a wonder to get on, after what I was."—J.B.

Do you realise what causes rheumatism? Nothing but sharp-edged uric acid crystals which form as the result of sluggish eliminating organs. Kruschen Salts can always be counted upon to clear those painful crystals from the system.

When hanging pictures remember that the centre of the picture should be on the level with the eyes. If you are unusually tall, this rule does not hold good.

Experiments have showed that sweet corn loses its sweetness six times as fast kept at 86 degrees Fahrenheit as at 32.

## Dominion Botanist Makes Plea For Botanical Gardens To Study Wealth Of Plant Life In Canada

Canada's need for botanical gardens in which to assemble and to study her great wealth of plant resources as well as plant wealth from other parts of the globe, was discussed recently by Dr. H. T. Gussow, Dominion botanist, in lecture theatre B, University of Manitoba. This need was first voiced in February, 1886, by the late Dr. William Saunders, who said: "It has long been a reflection on Canadian taste and progress that we have not botanical gardens in the Dominion. In Australia and India are several such gardens, supported by the government. Botanic gardens have also long been established in Ceylon, the Mauritius, Jamaica and several others of the West Indies. Canada is indeed the only important British colony where such an institution is wanting." In 1935 it is still wanting, but urgently needed, it was shown by Dr. Gussow.

Briefly defined by Dr. Gussow, a botanical garden serves as a centre for all branches of the study of plants, and fosters, insofar as possible, the practical application of the knowledge obtained by its workers, to economic, medical and industrial problems. It aims at making representation of as many families of plants as possible or of characteristics, orders and biologically interesting species. It is a living museum, and a place for rest and reflection. It is not a sports ground, nor an amusement park, though its beauties may delight the eyes and stimulate aesthetic and intellectual life, as does an art gallery or a museum.

The drawing power of botanical gardens is indicated by a reference to Kew botanical gardens—the world's most famous sample of this type of garden, in an annual attendance of 2,000,000 persons, many of whom are scientists and students from all parts of the world. Occupying 300 acres and equipped with a herbarium of two million specimens of plants and a library, Kew gardens serve all the world.

### Modelled After Mounties

#### Newfoundland May Soon Have New "Red Coat" Force

A force of rangers modelled after the Royal Canadian Mounted Police will be formed by the Newfoundland commission government as soon as approval is given by the Dominion office in London.

Consisting of 52 men at the start, the force will set up 18 posts on the island and five in Labrador, and for some time to come they will have to go through the pioneer work carried on in Canada by the Royal Northwest Mounted Police before the larger Canadian force was organized.

A chief ranger, one inspector, seven sergeants, six corporals and 37 rangers will be assigned to the task of patrolling Newfoundland, outside the Avalon Peninsula, and the great little known hinterland.

Aeroplanes, automobiles, motor boats, horses and dog teams will be their "mounts" as they carry on not only police work but "administrative activities in connection with customs, relief and protection of forests and game."

### Would Amend Criminal Code

#### Proposal To Prohibit Passing Of Death Sentence On Women

A proposal amendment to the criminal code which would prohibit the passing of a death sentence on any female person was filed with the clerk of the House of Commons by T. L. Church (Cons., Toronto East), the Toronto Globe says.

"Sentence of death shall not be passed on any female person under the provisions of this act," the Globe says the amendment reads. It also provides, says the Globe story, that, "on a trial by jury of a female person under any section of this act, one-third of the jurors chosen to try the issue shall be females, duly qualified on the same basis as male jurors."

2094

### Paintings May Be Valuable

#### Believed To Be Work Of Great Venetian Artist

A worn, discolored canvas which its owners believe is a famous "lost" Titian Madonna, and two other paintings supposedly by the great Venetian painter have been taken to New York for expert opinion.

The paintings are the property of Henry Cini, of Stafford Springs, Conn., who is sure that they are not only genuine Titians but worth \$1,500,000, too.

The paintings were taken to Mrs. Robert H. Grimes, at a Park avenue hotel. Several experts who have seen them have pronounced them "very valuable" and expressed the opinion that at least the Madonna is a real Titian, Mrs. Grimes said.

The "lost" Titian Madonna has been the despair of connoisseurs for many years.

The most elaborate of the Cini paintings shows a Madonna in faded rose and blue draperies holding a standing Christ Child while another celestial infant kisses the foot of the first one.

Another depicts St. Joseph holding the Infant Christ in his arms while the baby waves his staff. The third painting is of a guardian angel with one arm thrown around a smaller angel and the other arm outspread toward a bevy of cherubim. The canvas of the Madonna has some large holes, the St. Joseph smaller tears, while that of the guardian angel is almost ragged with age.

## GARDENING

Gordon L. Smith

### Early Stuff

With May almost here, it should be fairly safe to try a few rows of those vegetables which are not usually sown until later. If frost does come along, there is a small loss as the ground can be used over again, whereas if the stuff pulls through, there is the satisfaction of having from one's own garden vegetables unusually early. Beans, potatoes, corn, tomatoes and a few of the other tender and semi-tender vegetables can be treated in this way. With hardy sorts like spinach, radish and lettuce, one can make the first sowings just as soon as the ground is fit to work. Frost may hold them back but it will not hurt them. Handle the end of the planting season in the same way, that is make a sowing or two after the usual time for planting so that there will be stuff coming along weeks after the main crop has been picked.

### Gardening With Rocks

A few years ago a steep bank at the end of the lawn was regarded as a distinct handicap. Grass and ordinary flowers could not survive spring downpours. About the only solution was large trees and in front of these a screen of shrubbery or vines to hide the raw earth. Nowadays, people want such banks to create a rock garden and often where no bank exists, one is raised by artificial and expensive means. This is not to be confused with the old stiff and rather unsightly rockery. In the kind advocated here, boulders are set into the side of the hill, embedded so deep that frost will not seriously disturb them, and also in such a way that the soil between will lead back into the main bank. Between the rocks a miniature Rocky Mountain range is created with gulleys, alpine meadows, crags and steep canyons. Seed catalogues usually list alpine rock garden plants separately. It is most important to secure seeds and plants suitable to Canadian conditions and it is also advisable to get special literature on the subject, or visit a neighboring rock garden, before attempting too elaborate a layout.

### Use The Catalogue

A good seed catalogue is indispensable. Height of the flowers, times of blooming, whether they are suitable for such special purposes as edging, screening, cutting and fragrance are all mentioned and are vital facts in laying out a satisfactory garden. In the vegetable line the catalogue continues this useful service by listing different varieties under the heading of early, late and medium, so that a succession of vegetables is possible right through the season. With unusual sorts, special directions are given in regard to care and preparation for the table.

### Superstition In China

#### Laborers Reported To Have Made Human Sacrifices To Spirits

Superstitions which have persisted for centuries among South China farmers caused an enraged band to murder 16 railroad workers and kidnap 43 others. The crime followed fantastic reports that laborers had made human sacrifices of local residents to assuage the spirits who dwell underground, and to insure propitious weather for their work.

The fate of the 43 abducted workers is still unknown and fears have been expressed for their lives.

Reports were current recently in the Laiyang district, southwest of Honan, that railroad construction workers on the line between Canton and Hankow, near Chioukuoan, had killed several of the inhabitants in order to offer their blood as a sacrifice to the underground spirits.

### World's Most Accurate Clocks

#### Exhibits In Berlin Operated By Vibrations Of Quartz Crystal

Declared to be the four most accurate clocks in the world, novel time-pieces are being exhibited by the Reichs Institute for Physics in Berlin, where they were made. They are operated by the vibrations of a quartz crystal, and are said to deviate from the right time only 0.002 seconds in six months. The crystal is hung in a vacuum glass tube which is placed inside a box surrounded by a second box. The walls of both boxes are composed of copper tubes, air, aluminum and feathers, which keep the temperature within unchanged. An electric current is sent through the crystal which vibrates 60,000 times a second, and these vibrations influence an alternating current which keeps the clock going.

"The well-being of a people is like a tree; agriculture is its root, manufacture and commerce are its branches and life; if the root is injured, the leaves fall, the branches break away and the tree dies."—Shou-nung, Chinese Emperor and inventor of agricultural implements, 2800 B.C.

## Stanley Baldwin Sees European Nations Taking The Dangerous Road That May Lead To War

### Putting It In Figures

#### Expert Helps Us To Realize Destructiveness Of Dust Storms

If the reader happens to have wondered idly how much earth was moved in the recent dust storms in the Western States, of which reports have been appearing in press despatches, he might be interested in the estimate made by an expert of Kansas State College.

According to this expert, if a 96 mile line of 1½ ton trucks could be put to work hauling 10 loads each per day, it would take them a year to haul back to Western Kansas the dirt that was blown over to the eastern section of the State. Altogether, he figures, there would be 46,500,000 truckloads to be moved.

Putting the situation in this form helps one to realize the terrible destructiveness of a dust storm. It is not necessary to have very much imagination to understand that a large quantity of good farm land must have been ruined to provide all those millions of truckloads of dust. —Quebec Chronicle-Telegraph.

### Russia's Cheap Airplane

#### Is Only Suitable For Touring And Training Purposes

Russian experts, after long experimentation, announced the development of an aeroplane powered by an ordinary light automobile engine.

The engine is the type manufactured in great quantities by the Gorky motor factory.

The new plane is a two-seater which operates on ordinary auto gasoline. Inasmuch as it attains a speed of only 70 miles an hour its chief value aside from touring, is for training purposes.

The people who think the world is flat are about right just now.

European nations "are not walking the way of peace by those dangerous roads which may lead to war," Stanley Baldwin, lord president of the council, told the assembly of Free Churches of England and Wales.

Envisioning what a satirist of the 21st century might write of this age, he said:

"War left the constitutions of the great powers damaged and the convalescence was protracted and checkered. There were frequent setbacks of fever and temperatures rose above normal, sometimes to dangerous heights, and there were anxious moments when it looked as though the whole trouble would break out and infect all victims with the plague of 1914.

"Drugs and plasters were administered at Paris and Locarno. The patients were still alive but none could be said to be enjoying normal, robust health. No one was willing to undergo the major operation of disarmament.

"One remedy proved worse than a disease and spread like wildfire—economic nationalism. Some even tried a drastic medicine called dictatorship and a walk through Europe was like walking through the wards of a mental hospital. Each was filled with fear for the safety of its own particular brand of civilization."

In what was taken as a direct reference to Adolf Hitler's recent "air raid rehearsal" in Berlin, Baldwin said "we are not a people who will take with any pride or enthusiasm to the wearing of gas masks. Whether we have to wear them or not we will regard them as a monstrous and tragic necessity, born of the prostitution of science to the service of barbarism."

He charged Germany regarded the League of Nations as "a pawn in the struggle for national power and domination."

### Discovers Heart Disease Drug

#### Chinese Doctor Helps Isolate "Thevetin" A New Stimulant

From a poisonous nut, which has killed thousands of persons, medical science has isolated a new drug more effective than digitalis in the treatment of heart disease.

This announcement was made at Toronto by Dr. Albert S. Hyman, director of the Witkin Foundation of Beth Israel Hospital, and Dr. K. K. Chen, director of pharmaceutical research of the Lilly Research Laboratories in Indianapolis.

The new drug is called thevetin by its discoverers. It is derived from the nut of the be-still or yellow oleander tree, which grows in Hawaii and India.

Since last September it has been used experimentally with "remarkable success" at Beth Israel Hospital under Dr. Hyman's direction.

Dr. Chen, a brilliant Chinese, famous for his application of science to ancient Chinese remedies first began to investigate the properties of the be-still nut three years ago because of the death of many persons who had eaten it.

He found that it contained a powerful poison, but this poison, properly used, stimulated heart action. It is claimed that thevetin is superior to digitalis because it can be injected into the body, whereas digitalis has to be taken through the mouth.

### Cooking Under Water

An Englishman once undertook to cook a pudding at the bottom of the Thames. His friends declared it was impossible. But he proved them wrong by putting the pudding in a tin, then packing the tin into a sack full of lime, and lowering the sack into the river.

After three hours it was drawn up again, and it was found that the heat generated by the slaking of the lime had cooked the pudding.

The sacred African lily is a native of India, not Africa.

## The SNAPSHOT GUILD

THE CANDID CAMERA

It is the unusual, "candid" picture that attracts attention.

"Candid photography." What is it? Just this. It is one of the most fascinating branches of amateur photography and furthermore is fast becoming one of the most popular sports with those who wish to glorify their snapshot collections with unusual, out-of-the-ordinary type of pictures.

For excitement, candid photography is a first cousin to big game hunting or deep-sea fishing but you need not go to the wilds of the Congo nor off the coast of Florida to stalk your quarry. You will find plenty of material to shoot right in your old home town.

You may still say, "Well, what is this candid photography?" Candid photography is nothing more nor less than taking pictures of people when they are unaware that they are about to be "shot" so, therefore, you catch them in natural, unposed positions with natural expressions. It might be called "intimate" photography—informal snapshots.

The essence of candid photography is action. Get pictures of people doing things. Such pictures should be taken as close to the subject as possible, for we are usually featuring people in this type of photography and they should be predominating in the picture.

When we speak of snapping people in "action" or "doing something" it does not necessarily mean that the person should be actually on person asleep may make a great candid camera picture. He is doing something.

Don't think for one minute that the move. An unusual picture of a candid photography means that you go around just shooting in a hit-and-miss fashion. Any six-year-old child can do that. If you want to really enjoy the thrills that come with candid photography you will want to give it considerable thought.

The modern miniature camera has been the leading factor in the development and popularity of candid photography. First of all, its size makes it less conspicuous than the camera using a 3½ x 4¼ or larger film. It's ready for action on a moment's notice, for with the majority of makes the pressing of a button opens the camera ready for quick focusing.

Where, when and how you take your candid snapshots depends almost entirely on your equipment. If you are to be a real dyed-in-the-wool candid snaphooter you will shoot under conditions "as is" and not as you make them.

There are many things to consider in this fascinating hobby of candid photography and it takes practice and patience if you want to get the fullest enjoyment out of it. Next week we will discuss personal and mechanical requirements for the candid enthusiasts.

### Benefit to Farmers of Market Operations

There seems no reason to doubt  
that the wheat policy followed by the  
Dominion government consistently  
during the past four years has  
brought enormous benefits to the  
farmers of the Canadian prairies.

The government's policy has been  
to provide a cash market for the  
farmer's grain and to keep prices  
from slumping. It achieved both  
purposes by the purchase of futures  
through Mr. McFarland. As last  
year's crop was estimated at 275,-  
000,000 bushels it will be seen that  
each cent of support given the crop  
meant an additional \$2,750,000 for  
the farmers. And last year's was  
the fifth crop to be so supported.  
Hon. R. B. Hanson, minister of  
trade and commerce, during a recent  
visit to the prairies, stated that ap-  
proximately \$200,000,000 had been  
saved to prairie farmers through the  
government's wheat operations. As  
there are approximately 250,000  
farmers in the three provinces this  
amounts to an average of \$800.00.  
—VANCOUVER PROVINCE.

### KING OF WHEAT KINGS.

Seager Wheeler of Rosthern, Sask.  
is famous as a champion wheat  
grower. He has the distinction of  
having been crowned "world wheat  
king" five times: 1911, '14, '15,  
'16 and '18. In recognition of his  
agricultural achievements for the  
Dominion Dr. Wheeler is being  
given a trip to England by a number  
of his friends and the C. P. R.

Dr. Wheeler came to Canada when  
a boy of 16 years from the Isle of  
Wight and although he has suffered  
disappointments and failures his  
patience and pluck have brought  
him many successes. Besides having  
produced by selection two new varie-  
ties of wheat, Red Bobs and Kitchen-  
er, he has also won awards for oats,  
barley, grasses, fodder crops and  
potatoes.

### Westcott Notes.

The Westcott United Ladies Aid  
met on Wednesday last at the home  
of Mrs. Jack Robertson. After the  
usual meeting was concluded, a  
kitchen shower was held for Miss  
Marian Johnston, a June bride-  
elect. Mrs. Ed Parker spoke of the  
esteem in which Marian was held.

As the wedding march was played  
by Mrs. J. Hughes, little Margaret  
Robertson, dressed as a bride, drew  
in a gayly decorated wagon filled  
with kitchen utensils. A pleasant  
time was spent over the gifts and  
the best wishes of the members  
extended to the bride-to-be.

YOU will be MORE THAN  
SATISFIED by having your  
Watch, Clock, Phonograph, or  
Sewing Machine fixed right in

### THE OTHER SIDE.

(Contributed)

Mother's Day is now behind us,  
And we've all renewed our vow  
To protect the dear old lady  
Till the end of time—and how!

Tho' we did but do her justice,  
I maintain it's just too bad  
That not one breath was sacrificed  
In lauding poor old Dad.

Of course the old boy's grouchy—  
Disposition's just a wreck;  
Might be he's getting stooped  
(From others riding on his neck).

No longer young and handsome;  
Off his pep a bit I know;  
And soon there'll be just desert  
Where the hair's supposed to grow.

Ah yes! he's sadly bleached,  
But listen here my lad,  
Don't ever let it stop you  
From boosting for your dad.

For his his heart's not built of asphalt  
Or the stuff they put in bricks;  
You'll find it smoothly functioning  
And hitting on all six.

Don't forsake him, he's your daddy;  
Faithful friend and somethin' more  
Though sorta stale and quiet,  
He's still gamey to the core.

Hurry round and get his slippers  
Like a duty-loving son—  
The "Pioneer" and meerschaum,  
When his trying day is done.

Make him feel that you're his buddy  
One-hundred-odd per cent;  
'Twill plug him full of gratitude,  
The dear old weary gent.

Then annex this gentle 'minder,  
With emphases a few,  
When for Mother you petition:  
"And, please God, the Old Man  
too!"

### Doings Of Our Neighbors.

**OLDS:** Harry L. Ecklin, 81 years  
old, known for some time as the  
oldest man living in Olds, passed  
away in the Olds General Hospital  
Sunday morning. Deceased had  
been in failing health for about a  
year and contracted cold a few days  
ago, which developed into pneu-  
monia. He is survived by his wife;  
two daughters, Mrs. Archie Murray  
of Olds, and Olive at home; two  
sons, Ross of Calgary, and Leslie,  
who farms in the Olds district.

**INNISFAIR:** Wednesday afternoon  
May 1st at 4 o'clock the home of  
Mr. and Mrs. Earl E. Freeman was  
the scene of the marriage of their  
elder daughter, Emma Elsie Helen,  
to Mr. James Donald Russell of  
Flin Flon, son of Mr. A. T. Russell of  
Red Deer, and the late Mrs. Russell.  
The ceremony was performed by  
Rev. T. J. Stainton before the im-  
mediate relatives of the bride and  
groom and a few personal friends.

**RED DEER:** A closed season on  
waterfowl for the fall season of 1935  
was the feature discussion at the  
Red Deer Fish and Game Club's  
annual meeting just recently held,  
when the club decided to request  
the provincial game authorities to  
consider closing the duck-shooting,  
if these birds could be protected  
generally this fall in all the western  
provinces and in the neighboring  
American states. It was felt that  
the time has come when such restric-  
tions are necessary to save the water-  
fowl from extermination.

**CROSSFIELD:** One of the largest  
land deals in this part of the country  
was closed a week last Saturday  
when Lloyd Smith of Beiseker bought  
the old home place of the A. C. Ranch  
from the Robertson Estate. This is  
the northern portion of the ranch  
and comprises approximately 2200  
acres, situated in the municipal dis-  
trict of Beaver Dam.

### Agricultural Notes.

According to the livestock survey  
as at December 1, 1934, the number  
of hens and chickens on farms in  
Canada was 46,487,230.

Milch cows in Canada increased  
in numbers from 3,659,200 head on  
December 1, 1933 to 3,847,400 on  
December 1, 1934, or 5.1 per cent.

Production of processed cheese  
in Canada for 1934 amounted to  
11,996,348-lbs., an increase over the  
preceding year of 1,361,324-lbs., or  
13 per cent.

The Egyptian market absorbs a  
number of Canadian products such  
as cheese, bacon, evaporated milk,  
flour, apples, pears, canned salmon,  
soap, leather and druggists' sun-  
dries.

As with other crops the surface  
soil of the rosebed should be kept  
loose by frequent shallow hoeing or  
raking. This practice not only  
keeps down weeds but allows the  
air to enter the soil and conserve  
moisture.

The tobacco-producing areas of  
British Columbia extend 250 miles  
northward from the international  
boundary to the main line of the  
C.P.R. and include the districts of  
Keremos, Grand Forks, Oliver,  
Summerland, Kelowna, Winfield,  
Langston, Vernon, Kamloops and  
Ashcroft.

During the fiscal year ended on  
March 31, 1935, 198,916 boxes, or  
about 13,924,120-lbs. of Canadian  
dressed poultry were inspected for  
export, local and inter-provincial  
shipment under supervision of the  
livestock branch of the Dominion  
department of agriculture. This  
was an increase in shipments over  
the 1933-34 fiscal year of 73,331  
boxes or about 5,133,170-lbs.

"The trouble with home life is  
that so many homes have become  
mere filling stations."

### Here and There

With the warm weather and  
a fine season almost upon us,  
dates of opening of the summer  
hotels and resorts of the Canadian  
Pacific Railway will be welcome  
news to tourists. Banff Springs  
Hotel opens, June 16; Chateau  
Lake Louise, Emerald Lake Cha-  
let and bungalow camps Wapta,  
Yoho, Radium Hot Springs and  
Moraine Lake, June 21; French  
River Bungalow Camp, June 15;  
Devil's Gap Bungalow Camp,  
June 21; Algonquin Hotel, St.  
Andrews, N.B., June 29; The  
Pines, Digby, June 27 and the  
Lakeside Inn, Yarmouth, June 23.

Portland, Oregon, famous an-  
nual Rose Festival will be held  
this year, June 6-8. Millions of  
rose blooms will be on display in  
the many floats of the grand flori-  
al parade and also in the 47th  
annual show of the Portland Rose  
Society.

Marking the Silver Jubilee cele-  
brations of the coronation of King  
George V. to be held this year,  
the Canadian Pacific Railway  
has issued a strikingly handsome  
folder covering the main events  
of the function from the King's  
drive to St. Paul's Cathedral on  
May 6 and ending with the Lord  
Mayor's Show on November 9.

A beautiful new menu card for  
the King's Jubilee celebrations  
has been designed by the Cana-  
dian Pacific Railway to be used  
in all the company's hotels from  
coast to coast, on ships of the  
Atlantic and Pacific fleets and  
on world cruise ships. Its front  
cover is done in gold with the  
Canadian Coat of Arms in color  
at the top and the Canadian Pa-  
cific crest at the bottom. The  
back cover, also done in gold,  
shows a train in the Rockies, the  
Chateau Frontenac at Quebec City  
and the Empress of Britain. A  
maple leaf below the Coat of  
Arms and a space on the back  
for autographs completes the  
menu card.

The world is invited to attend  
the annual Rose Festival to be  
held at Portland, Oregon, June 6,  
7 and 8. This, one of the out-  
standing fetes of the United  
States, will this year show many  
new and beautiful features,  
among which the 47th annual  
rose show of the Portland Rose  
Society will be not the least im-  
portant. The whole city will be  
embowered in roses at that time  
of year.

Over the period May 15-28 in-  
clusive, the Canadian railways  
are offering special bargain fares  
figuring approximately at one  
cent a mile from various eastern  
cities to western Canada. Return  
limit is thirty days from the date  
of issue of ticket with stopovers  
within the limit of the ticket at  
Port Arthur, Armstrong and  
points west thereof.

Addressing an audience of more  
than a thousand representative  
business men at Toronto recent-  
ly, E. W. Beatty, K.C., LL.D.,  
chairman and president of the  
Canadian Pacific Railway, stated  
that the Canadian National Rail-  
way system was never an honest  
experiment in public ownership  
and that it was neither more nor  
less than a sad accident. This  
problem, he said, constitutes Cana-  
da's most difficult problem and  
threatens national solvency.

## WORLD HAPPENINGS BRIEFLY TOLD

Nelson R. Butcher, who picked up his shorthand while working on a farm and later became recognized as peer of Canadian court reporters, died recently in Toronto.

Preparations for the King's Jubilee Celebration resulted in the biggest monthly drop in British unemployment in three years, the ministry of labor announced.

Sixty members of the Canadian Legion headed by Hon. Philippe Roy, Canadian minister to France, made a pilgrimage to Vimy Ridge. Representatives of the British Legion accompanied them.

Paving the way for heavier levies on higher incomes in Alberta, the government introduced a resolution in the legislative assembly to provide for a bill to amend the income tax act.

Children 12 years of age and over will be tried for crimes and be liable for the full penalties of the law, excluding capital punishment, the same as adults, the Soviet government announced.

Some of the 400-year-old records of the central Paris courthouse were destroyed by a fire which raged more than an hour in ancient St. Louis tower before firemen brought it under control.

Total amount of outstanding Dominion tax free bonds aggregates \$326,960,900, Secretary of State C. H. Cahan stated in an answer tabled in the House of Commons. J. F. Poul Iot (Liberal, Temiscouata) raised the question.

Another England-Australia air derby with generous prizes may be held next December in honor of the centenary of South Australia, Premier R. L. Butler of South Australia said in a speech at London. The race would finish at Adelaide, capital of South Australia, he said.

The weight of a loaf of bread in Canada is not standardized but it is regulated by municipal by-laws in the various provinces with the exception of Ontario. In Ontario the legal standard weight of a loaf is fixed at 24 and 48 ounces, except that in the case of "small bread" the limit is fixed at 12 ounces.

Exports from Argentina are greater than a year ago.

## NEW SUPER-LINER "QUEEN MARY"

—Cunard White Star Photo.

The decision of Cunard White Star marine designers to retain the knife-edge bow in the new super-liner "Queen Mary", as against the so-called bulbous bow, has started quite a controversy in shipping circles. All of the large liners built within the last few years feature the bulbous bow. However, it was the knife-edge bow which enabled the Mauretania to keep her laurels as speed-queen of the Atlantic for 22 years after her launching. The "Queen Mary" is expected to enter the trans-Atlantic service in the early summer of 1936.

## Birds Cause War Worry

**Superstitious People Of Northern Europe Dislike Wax Wings**

Because birds known as wax-wings have been seen recently in northern countries of Europe superstitious people are predicting a European war or some other great calamity. For centuries the arrival of wax wings in winter has been regarded over a great part of Europe as a harbinger of war, plague or death. They are said to be the devil's own birds and bear his mark in the shape of a globe of what looks like scarlet sealing wax at the end of the shaft of some of the wing feathers. In recent times the old belief has been strengthened by their being seen during the winter preceding the World War and the Franco-Prussian war.

## A Huge Investment

**Livestock Industry Is Very Valuable To Canada**

The Dominion bureau of statistics reports the value of farm livestock in Canada for 1934 at \$413,837,000 compared with \$403,135,000 in 1933, estimated the average value per acre of Canadian farm land and buildings at \$23 compared with \$24 in 1933 and the combined monthly value of wages and board for the 1934 summer season at \$33 for men and \$22 for women.

It said the wage and board rate for men was \$1 a month more than in 1933 and the same in both years for women.

Japan's most famous archer was Tametomo.

## Noted British Inventor

**J. L. Baird Is Classed With Edison And Marconi**

The adoption of J. L. Baird's television invention by the British government experts is the climax of a romance every bit as remarkable as that of Edison and Marconi, says the News of the World. Mr. Baird is a son of the manse. He was born at Helensburgh 46 years ago, and was so precocious that by the time he was 14 he had fitted the house with its own electric light and telephone system. When the war interrupted his studies he sold socks and a boot polish of his own invention, made jam in Trinidad, and when he was driven back to London by ill-health became a dealer in honey, fibre and soap. He has been working on his invention since 1924, at first in Hastings, then in two rooms in Soho, and latterly in one of the towers of the Crystal Palace. In appearance he is a big, absent-minded looking man with a mop of long fair hair, steel spectacles, and untidy clothes. He married in 1931 Miss Margaret Albu, a pianist well known to B.B.C. listeners.

## Has Education Campaign

**Idea In Afghanistan Develops Into Race With India**

Afghanistan is progressing with the campaign started by King Amanullah to make his people like Europeans, even though he lost his crown in the attempt. One phase is the advancement of education and this has developed into a race with India. Five miles outside Kabul a new university is being established and will be called Darulmann, or City of the Mind. Already professors from France and Germany are holding classes in Kabul. Afghan students have been sent to Europe for education. On the other side of the border Peshawar is to have its own university along the same lines as other universities in India. This will mean a new standard of education for the Pathan people, many of whom have relations in Afghanistan, and there will be a continual race for advancement.

Cowhides to the value of \$277,547; sheepskins, \$134,444; calfskins, \$117,441, and "harness leathers", \$322,940, were used during 1933 by the Canadian miscellaneous leather goods industry, which includes harness, saddlery, trunks, bags, purses, and belts. Other farm products in the shape of goatskins and pigskins were also used in smaller quantities.

## \$2,000 GOLD CUP FOR INTERNATIONAL GOLF TOURNAMENT AT FONTHILL, ONTARIO, JULY 11-12-13

Never in the history of Canadian golf has so handsome or valuable a trophy been donated for competition as the Seagram Gold Cup, presented by Seagrams for the six-man-team competition in the General Brock Hotel Open Golf Tournament to be played at the Lookout Point Golf Club, Fonthill, Ontario, on July 11, 12 and 13. The cup stands eighteen inches high, is mounted on an ebony base and is a very fine example of the goldsmith's craftsmanship of several hundred years ago. Moulded from Ormolu metal and plated with eighteen carat gold, it could not be duplicated to-day for less than two thousand dollars. Through Christie's of London, England, this trophy was secured from the estate of Lord Darnley.

The presentation of this heirloom

revives memories of the ill-fated Lord Darnley (1545-1567), great grandson of Henry VII, first husband of Mary Queen of Scots, and father of James I. of England. Lord Darnley was considerable of a reprobate and his marriage with Mary was connived by Queen Elizabeth to anger John Knox as it would place their heir, a Catholic, in line for the throne. Lonely for the continental life she had been accustomed to, for Mary was brought up at the court of the Dauphin in France, she brought Rizzio, an Italian musician, to the Scotch court to entertain her. Returning one night in a rage, the jealous Darnley had Rizzio murdered by his followers. The Italian's dead body was then presented to the Queen. A short time later, when he was twenty-one years of

age, Lord Darnley was murdered at the instigation, it is believed, of Mary and the Earl of Bothwell, for in the middle of the hunting season, when Darnley and his followers were celebrating at his hunting lodge, it was blown up.

The Cup's magnificent workmanship makes it a most attractive trophy and the winning team returning the lowest combined aggregate score for the seventy-two holes of medal play will keep it for one year. In addition, each member of the team will receive \$50.

Entries are contemplated from teams representing Canada, Japan, native-born United States professionals, and foreign-born United States professionals and amateur teams from both the United States and Canada.

**"No More Cheap Mustard for Me!"**

"What's the trouble now, Anne?"

"I made up my usual tried and tested Pickle recipe, but a friend of mine told me to use Bulk Mustard, it was cheaper. I did. It spoiled the lot!"

"That's too bad, Anne. You'll stick to Keen's after this! It is the pure mustard, so you always know just how much to use and you need never waste or spoil anything."

## KEEN'S D.S.F. MUSTARD

Made from seed grown especially in the Fens of England. The shells or hulls are removed, all the virtue being in the inner part of the seed. A superfine grinding makes the full flavour readily available. In original tins for as little as 10c.

## Rare Operation

**Cornea Of Eye Of An Infant Transplanted To Eye Of Adult Patient**

A comparatively rare surgical operation was reported by the Columbia Presbyterian medical centre, in which the cornea of the eye of a stillborn baby was transplanted in the eye of Fremont Clark of Wadena, Ia.

The success of the operation, performed by Dr. Ramon Castroviejo, cannot be determined for several days. The operation was described as "unusual when effective." The patient's eyelid is sewn shut and the eye heavily bandaged so that the tissues may be undisturbed in taking root.

## May Buy A 'Plane

**Eighty-Year-Old Man Has Had Colorful Career**

John Hays Hammond dug mines for precious metal under the surface of four continents, and got himself mixed up with a Mexican revolution and one in South Africa while doing it. Sunday, March 31, was his eightieth birthday and he has said that he might buy himself an airplane to celebrate. A veteran of pony express days in the Wild West, this eminent engineer recently has made considerable use of airplanes and blimps, "now that I can afford to take chances I couldn't as a younger man."

CHAPTER XVI.—Continued

"But . . . My God, man! To do that you've got to inform on Peyotl . . ."

"Well . . . What if I do? What good is Peyotl to anybody?"

"You . . . You can't do it, Sam. You just can't do it."

"Who? Me? I'll show you. I mean to have that girl. We've got our safe full of cash right now. In a week we'll own the Hour-glass and Soda Springs and the mine that old man Kane found. In a year I'll be travelling with my red-headed wife and you can buy one for yourself. Like it?"

Spike did not like it and said so. The risks were too great. But Dustin did not even listen to his objections. He rose suddenly and seized his hat.

"I'm goin' over to the Hour-glass right now," he said.

Spike watched him go and shook his head.

"I wish to God I'd kept clear o' Sam," he muttered. "They got nothin' on me though. It's always been Sam gave the orders about the cattle. It's been Sam tended to the money end of it. Come to think of it, if anything happens maybe I'll prove to be the smarter man. Sam's headin' fer trouble if his foot slips."

But Dustin was heading at that moment for the Hour-glass. He knew that Crewe and Carr with Stone would be delayed in Seco and he wanted to be the first to tell the news to Edith.

She met him as he was dismounting amid a ring of angry men, for the Broken Spur was not loved at the Hour-glass. Dustin stared them down and faced her calmly.

"I came over here to-night as a neighbor should," he said. "I've got some bad news for you. . . ."

"So you came to enjoy telling it . . ." She flung the words at him. "Go on. Tell your news . . . and go."

"All right . . . If you want it like this. But I warn you, you'd better send those men away and see me in private."

She scanned him even-eyed. There was some indefinable thing about him that convinced her that on this occasion at least he was telling the truth.

"Come then," she said shortly. The men stared after them as she led the way into the house and a little murmur arose that Red Thom quieted. The moment they reached the office she turned shortly on him. "Well," she said: "What is it? To what do we owe the honor of this call?"

"Do you know where your father went?" he asked.

"Of course. To meet his partner, Mr. Gerald Keene, who came on the evening train."

"Right. I'll tell you where he is now . . . They all went to the Silver Dollar saloon. Your father, Crewe, that wrangler Stone and the man Keene. They had hot words there of some kind. The lights went out. There was a shot fired. When the lights came on again the man Keene was lyin' over the roulette table shot through the body and they searched everybody. They found a Derringer pistol that had been fired in your father's pocket. He was standin' right by Keene. . . ."

For just a fraction of a second Dustin shrank back from the light in her eyes.

"You . . . You liar. . . ." Scorn ineffable rang in her voice. "To come here and tell me a thing like that . . . You mean to tell me that my . . . my father shot this Mr. Keene?"

"No. . . ." He held up a delaying hand. . . . "I mean to tell you that the Sheriff has got evidence that will send your father to the gallows for having shot Gerald Keene. I'm the only man in the world who can prove he didn't . . . Get me now? The first thing they'll search for is a motive. Why should Joe Carr shoot his partner? They'll find the motive in old Peter Vinton's will. The man Keene died a little while ago. You can verify what I say by telephone. Call up Doctor Epps. He's taken the wounded man to his house. By Keene's death, your father gets the other half of the Hour-glass. He owes me more than he can pay. There's the motive. The fact remains that I've told you the truth. The Sheriff has got proof that your father shot his owner partner to get his share of the Hour-glass. . . . That's part of what I've got to tell you. . . ."

She swayed on her feet and her face, once red-and-white turned pale but the light in her eyes never changed.

"Call up Epps in Seco on the phone," he said.

She stepped to the wall-instrument, snatched the receiver and got the number. Dustin could not hear what was said from Seco but he saw her face blanch and her lips quiver. Her free hand grasped at the wall for support.

"Then as I understand you, Doctor, my father is under arrest for the . . . the killing of Gerald Keene . . . Is that right?"

Followed a buzzing again across the wire that her clear voice cut.

"What? . . . You say Mr. Keene died a short time ago . . . ? Oh . . . I see. . . ."

She turned away from the telephone and faced Dustin and her whole demeanor changed. She seemed to have shrunk and lessened but her eyes shone with an indomitable glow.

"He . . . Doctor Epps says you are correct . . . That my father undoubtedly shot Mr. Keene. He says Mr. Keene died. . . . And . . ."

For the first time she broke down and sank into a chair and buried her face in her hands while her body shook. Dustin came over and stood by her and ventured to lay a hand on her shoulder.

"It may not be quite as bad as you think," he said.

"How? Not as bad as I think . . . I know Daddy never did it. Of course he didn't do it. . . ."

"The Sheriff has evidence that he did," said Dustin. "They've estab-

lished the motive. They found the man dead across the roulette table. Shot with a big soft-lead bullet from a Derringer pistol. They found Carr standing right by him and in his pocket was a Derringer pistol. It had just been fired and the bullet from Keene's body fitted it. Will a jury want more evidence than that? Use your brains."

She could not. They seemed atrophied.

"There's one way out," he said. His eyes sought hers but her gaze wavered and dropped. Some occult sense told her what was coming.

"What would you give," he said, "if a man could be found who could refute all that circumstantial evidence? What price would you be willing to pay to save your father a coroner's inquest, an indictment, a trial and . . . a conviction. That conviction means a hanging."

"You mean . . . To hang some one else . . . ?"

"I mean to hang the really guilty man. Look here. No beating about the bush! I know who shot Keene. I'll come forward and give testimony that will clear your father and hang the guilty man . . . If you will marry me. . . ."

Her eyes stabbed him like a knife. "You . . . you cur," she said. "To bargain over a man's life. I knew what you were. . . ."

"Stick to your tie-ropes," he said. "If I forget what I know, your father hangs. . . ."

In less than ten seconds she reconstructed the evidence. She knew that Dustin told the truth. The evidence was sufficient for any Frontier jury. Her father would hang.

"I . . . I . . . You mean that if I marry you, you will clear my father?"

"Exactly. You've put it in a nutshell. . . ."

"I . . . I want time. . . ."

"In twenty-four hours the man will have left the country."

"I . . . I can't tell you now . . . I want time. . . ."

"I give you till to-morrow. . . . Can't you be decent just once? There is no question of love in this . . . I hate you. . . ."

"What difference does that make? I break any horse in my corral till he answers to my hand. You'll do the same. I want you. That's enough! If I choose to marry the daughter of a cold-blooded murderer who shot his own partner . . ."

The telephone jangled again and she leaped for it.

"Epps again, Miss Edith. Crewe is comin' right out. Stone is staying in for the night." She turned to Dustin.

"Come over to-morrow," she said wearily. "You know of course that I will try to find some way out of this . . . If there is no way . . . I . . . I . . . I'll have to pay the price."

He had to be content with that but he almost slunk to his horse as he walked to the horse-block under the malignant stare of the Hour-glass waddies.

Stone went straight to Jameson's office and stayed there till Jameson stormed back into the place.

"No luck at the Broken Spur," he said. "Peyotl isn't there. And I can't get any trace of old man Kane. Have you telephoned Epps?"

"Listen to me, Jameson. I'm layin' all my cards on the table . . ."

## Nervousness, dizzy spells, tiredness, headaches . . .

Get rid of them this safe,  
natural and inexpensive way

Now you can banish constipation without the use of costly, habit-forming drugs. Doctors advise Quaker Bran — the natural coating of the wheat. Let it work with nature to promote normal, healthy bowel movement.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked — untreated—unadulter-

ated. For these reasons it is definitely richer in mineral and vitamin content.

There are many pleasant ways of eating this natural corrective.

Mix it with your regular cereal each morning or make delicious muffins and cookies with it. Each package of Quaker Natural Bran contains a booklet of easy recipes for delicious bran dishes.

## QUAKER BRAN

Pure, Natural, packaged bran.

2513

But one. I'm keepin' an ace buried. Joe Carr never fired that shot. The man who shot Keene had the gun wrapped in this. . . . He laid before the editor that yellow-and-green bandanna . . . "Look at the shot, holes in it. Smell it. . . ."

Stone fished from his pocket the broken fragments of cigarettes that he had found by the lonely camp-fire up Red Water canon and the single specimen that he had taken from Dustin in the golpe de caballo.

"Check 'em up," he said. "Who do you reckon fired that shot?"

Jameson considered carefully. "Some one who uses peyotl," he said. "All right. Who's that?"

"I only know one. . . . Peyotl Gregg and he ain't to be found at the Broken Spur."

"There's only one other place he can have gone. If he's not at the Broken Spur he must be here in Seco."

"We can probably find him down in the Mexican settlement," said Jameson. "That's the only place he can get his drug. Let's go there."

It took three hours but they finally dug Peyotl up, a drug-soddened wreck from the jacale of Pascual Mendez. He reeked of sotol, that drink that has a special stink of its own, and they slammed him uncereemoniously into the rear seat of Jameson's car.

"You question him," said Jameson. "Where did you get the pistol that you shot that man Keene with?" demanded Stone.

(To Be Continued)

### Queer Things At Auction

Only Curio Dealers Bid For Hand Of Witch

A witch's hand was offered at auction in London recently. It was that of Mary Holt, a Pulborough woman, who was hanged for witchcraft. It was not sold. Only curio dealers bid for it. They went up to nearly \$20, at which point the hand was bought in by its owner. The same thing happened to a heart pierced with pins, another old Sussex witchcraft charm. One Hallett, who lived at New House, bragged with considerable success, and prospered greatly with the aid of his charms. Examples of his "life-giving" stock-in-trade were on sale. A glass-encased "grotto" called by Hallett a Nativity brought \$55.

### Still Use Old System

Steaming Ashes And Nile Mud Hatch Chicks In Egypt

Every year Egypt exports hundreds of millions of eggs to other countries, yet hens with chicks are almost never seen there. The explanation is that eggs are artificially hatched by a system that has not changed in 4,000 years. The eggs lie for a while in steaming ashes, deep down in the hatching pits. Later they are put beneath black cupolas of Nile mud, lying on camel dung and covered with palm leaves. The system is so accurate that attendants can tell to the hour when the chicks will hatch.—Detroit News.

## Constipation Gone Says Montreal Woman

Mrs. J. H. Laliberte, 7236 Drolet St., Montreal tells under oath how Fruit-a-tives brought her quick relief from constipation. She gave her experience before a notary so you would be sure that it is true. Mrs. Laliberte relates,—"I used to be taken with bad spells of irritability and lassitude. I could not eat right. I did not sleep well and could do my work only with great difficulty. This was due to chronic constipation from which I suffered severely. Soon after I started using Fruit-a-tives I became regular, my headaches and irritation disappeared. I have lots of energy now and can do all my work without any trouble."

Copy of Mrs. Laliberte's sworn statement will be sent on request. Write Fruit-a-tives Limited, Ottawa, Canada.

FRUIT-A-TIVES—25c and 50c EVERYWHERE

### Australia's Wedding Gift

Carefully guarded and heavily sealed, a box containing two cups of Australian gold, the wedding gift of the Commonwealth of Australia to the Duke and Duchess of Kent, arrived at Plymouth, England, nearly three months after the ceremony.

## LOCAL & GENERAL

Mrs. Ranton is visiting relatives and friends at Edmonton this week.

Mrs. Brusso is visiting friends in Calgary this week.

Mr and Mrs H Goehring and Miss Florence Korschuh motored to Calgary on Friday.

Mrs. Frank Gostick of Calgary will address a mass meeting on Social Credit in the Opera House next Monday evening, May 27.

The Congoleum Rug contest which was held at the Builders' Hardware was won by Miss Jane H. Caldwell of Sundre.

George Hawkes, who graduated from the University of Alberta this year, has been awarded the degree of bachelor of Science.

Florence McNeil, who has been in the Hospital for the past two weeks, was able to return to her home on Monday.

Dr Clarke left for Edmonton on Sunday where he will spend the week taking a "refresher course" at the University.

**SALE OF SHOES**—Reg \$3.95 Shoes at \$2.95, and Reg. \$2.95 at \$1.95. Also One Third Off All Children's Shoes.—Mrs. WILSON, Main Street. (20p)

There was a big movement of wheat from Didsbury this week when 13 cars containing 26,000 bushels were shipped to Fort William.

Mr and Mrs. H Hawkes motored to Edmonton on Wednesday to attend the convocation of the University of Alberta from which their son George is graduating.

**Piano Tuning De Luxe**—Messrs. Gavin Spence and W. H. Norton, who had to stop working Didsbury district on account of rain, will return next week to finish up. Leave orders at Pioneer Office.

Mr. Clint Reiber returned from his vacation trip to California on Saturday. Clint was accompanied by Mr. Chas. Hildebricht of Olds and they took the sea voyage from Victoria to Los Angeles.

Mr and Mrs H J Friesen and family of Didsbury were visitors at the home of Mr and Mrs W. D. Allan on Monday (last week). During the weekend they were visitors in Champion with friends. VULCAN ADVOCATE

Mrs. F. W. Leeson has returned from Vancouver where she attended the graduation exercises of the University of British Columbia. Her son, Mr. Robert Bligh Leeson, who formerly attended Didsbury High School, received the degree of Bachelor of Commerce.

Mr. Benny Robinson of Morrillville visited here over the weekend and on his return was accompanied by Mrs. Robinson, who has been visiting her mother, Mrs. Sexsmith for a few weeks. Mr. Robinson reports that very little seeding had been done in the north country on account of wet weather.

Rakes, forks and wheel-barrow instead of school books were in evidence at the school grounds on Monday afternoon when the public school children, under the supervision of their teachers Messrs C R Ford and E. Traub, had a busy afternoon raking up the school grounds. The improvement was very noticeable when the job was done.

## Melvin Notes

A dance will be held at Melvin School on Friday, May 17. Halliday's orchestra.

Shipper of Livestock

Indications from representatives of the Canadian Pacific Railway throughout the world are that pleasure travel this year will be on a greater scale than any time in the last two years, bringing more visitors to Canada from the United States, Europe, and the Orient, and pouring millions of dollars into Canadian pocket-books.

Western Canada is expecting a good share of this traffic and the Canadian Pacific Railway is making extensive preparations there in its hotels and bungalow camps. Dates have been arranged for special entertainments at Banff Springs Hotel, which opens on June 16, and Chateau Lake Louise, which opens on June 21.

With Banff or its sister resort,

Lake Louise, as headquarters, tours can be made to such well-known places as Johnston Canyon, Moraine Lake and the Valley of the Ten Peaks, the Lakes of the Clouds, the Plain of the Six Glaciers, the Great Divide, Wapta Lake Bungalow, Yoho Valley and bungalow camp, Takakkaw Falls, the historic Kicking Horse Pass, Mount Stephen, and the great mountains near Field, B.C.

The large Canadian Pacific Railway hotel at Banff is equipped in every way for the comfort of visitors; the hot radio-active sulphur springs have been turned into a swimming pool, side by side with a pool filled with fresh water; the rolling floor of the valley has been made into a picturesque golf course; there are

fast, well kept tennis courts.

Throughout the summer there is fun and plenty to do at this beautiful resort, with special events at short intervals, starting with the Calgary Stampede which will be held from July 8th to 13th. Two societies with world-wide membership will hold their official outings, the Trail Riders of the Canadian Rockies from July 26th to 30th, and the Trail Hikers of the Canadian Rockies from August 2nd to 4th. Indian Days will return to Banff from July 19th to 21st, when Western Indians in their native costumes will re-enact ancient tribal ceremonies. The Banff Golf Week, with the Prince of Wales Trophy as the main prize, is from August 28th to 31st.
